To the Ladies & Gentlemen at FCC, I installed XM in my truck in April, 2004. I have not listened to local stations on that radio since. I feel that it should be my choice whether I listen to local or XM for weather & traffic. Trying to find a local station in each major city is not always easy. Also if I am needing to know what roads are open, I don't want to listen to 10 to 15 minutes of talking or songs or games. As I drive a big rig, it is important to get the information I need so I can get around the tie-ups and traffic jams. Please don't allow big business to pressure the government into doing their bidding.

Sincerely.
Ward M Barrows
